ABRASILVER

RESOURCE CORP

Transforming Exploration into Value

www.abrasilver.com

Disclaimers

This presentation, as supplemented or amended from time to time, is for information purposes only and does not constitute an offer to sell or a solicitation of an offer to buy securities. The information contained herein has been prepared for the purpose of providing interested parties with general information to assist them in their evaluation of AbraSilver Resource Corp. ("AbraSilver" or the "Company") and this presentation should not be used for any other purpose.

This presentation does not contain, nor does it purport to contain, a summary of all of the material information concerning the Company or the terms and conditions of any potential investment in the Company. If and when you determine to proceed with discussions and investigations regarding a possible investment in the Company, prospective investors are urged to carry out independent investigations in order to determine their interest in investing in the Company. Prospective investors should not construe the contents of this presentation as legal, tax, regulatory, financial or accounting advice and are urged to consult with their own advisers in relation to such matters. This presentation is not, and under no circumstances is to be construed as, a prospectus, an advertisement or a public offering of securities in Canada, the United States, or any other jurisdiction. No securities commission or similar authority of Canada, the United States, or any other jurisdiction has reviewed or in any way passed upon this document or the merits of the securities described herein, and any representation to the contrary is an offence.

FORWARD-LOOKING STATEMENTS: This presentation contains "forward-looking statements" and/or "forward-looking information" (collectively, "forward-looking statements") within the meaning of applicable securities legislation. All statements, other than statements of historical fact, are forward-looking statements. Generally, forward-looking statements can be identified by the use of forward-looking terminology such as "plans", "expect", "is expected", "in order to", "is focused on" (a future event), "estimates", "intends", "anticipates", "believes" or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", or the negative connotation thereof. In particular, statements regarding the Company's future operations, future exploration and development activities or other development plans constitute forward-looking statements. By their nature, statements referring to mineral reserves or mineral resources constitute forward-looking statements. Forward-looking statements in this news release include, but are not limited to statements with respect to the results (if any) of further exploration work to define and expand or upgrade mineral resources and reserves at the Diablillos Project ("Diablillos" or the "Project"); the anticipated exploration, drilling, development, construction and other activities of the Company and the results of such activities, including the completion of a preliminary scoping study in H1/2024; the mineral reserve estimates of the Project (and the assumptions underlying such estimates); the ability of exploration work (including drilling) to accurately predict mineralization; the focus of the anticipated Phase IV exploration campaign at the Project; the ability to realize upon mineralization in a manner that is economic; and any other information herein that is not a historical fact.

The Company considers its assumptions to be reasonable based on information currently available but cautions the reader that these assumptions regarding future events, many of which are beyond the control of the Company, may ultimately prove to be incorrect since they are subject to risks and uncertainties that affect the Company, its properties and business. Such risks and uncertainties include, but are not limited to, changes in demand for and price of gold, silver and other commodities (such as fuel and electricity) and currencies; changes or disruptions in the securities markets; legislative, political or economic developments in Argentina; the need to obtain permits and comply with laws and regulations and other regulatory requirements; the possibility that actual results of work may differ from projections/expectations or may not realize the perceived potential of the Company's projects; risks of accidents, equipment breakdowns and labour disputes or other unanticipated difficulties or interruptions; the possibility of cost overruns or unanticipated expenses in development programs; operating or technical difficulties in connection with exploration, mining or development activities; the speculative nature of exploration and development, including the risks of diminishing quantities of grades of reserves and resources; and the risks involved in the exploration, development and mining business and the additional risks described in the Company's most recently filed Annual Information Form, annual and interim management's discussion and analysis and other disclosure documents which are available on SEDAR+ (www.sedarplus.ca) under the Company's issuer profile. The Company's anticipation of and success in managing the foregoing risks could cause actual results to differ materially from what is anticipated in such forward-looking statements. Although management of the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by applicable securities laws.

Advancing a World-Class Silver & Gold Project

Diablillos: Large, Advanced Silver-Gold Project

P&P Reserves⁽¹⁾: 42.3Mt @ 91 g/t Ag & 0.81 g/t Au
123 M oz Silver & 1.1 M oz Gold (209 M oz AgEq)

M&I Resource⁽¹⁾: 53.3Mt @ 87 g/t Ag & 0.79 g/t Au
148 M oz Silver & 1.4 M oz Gold (258 M oz AgEq)

Industry-Leading Exploration Growth

Since 2020, ABRA has grown Diablillos' M&I resource by ~100%, at an avg **discovery cost of only US\$0.11/oz AgEq**⁽²⁾

Large land package w/ **multiple high-priority exploration targets currently being drilled**

Robust Project Economics

Updated Pre-Feasibility Study ("PFS")
Results Dec.'24

NPV_{5%}: **US\$747 Million** (~C\$1,046M);
IRR of 28%; 2.0 year payback

- base-case prices of \$25.50/oz Ag & \$2,050/oz Au

Avg. Production: 13.4Moz AgEq (7.6Moz Ag, 72 koz Au); **AISC of \$12.67/oz AgEq**

Solid Financial Position & Strategic Shareholders

Healthy cash position of ~C\$14M (as of Sept. 30)

Strong Ownership: ~22% of shares are held by strategic investors and Insiders.

Notes: Current Mineral Reserves effective as of Mar. 07, 2024. M&I Resources are shown inclusive of Reserves. Refer to press release dated Mar. 25, 2024 for details

Upcoming Catalysts**

Salta Ranked #1 for Investment Attractiveness in Latin America in 2023¹

Salta: Consistently ranked as one of the most attractive mining jurisdictions in Latin America

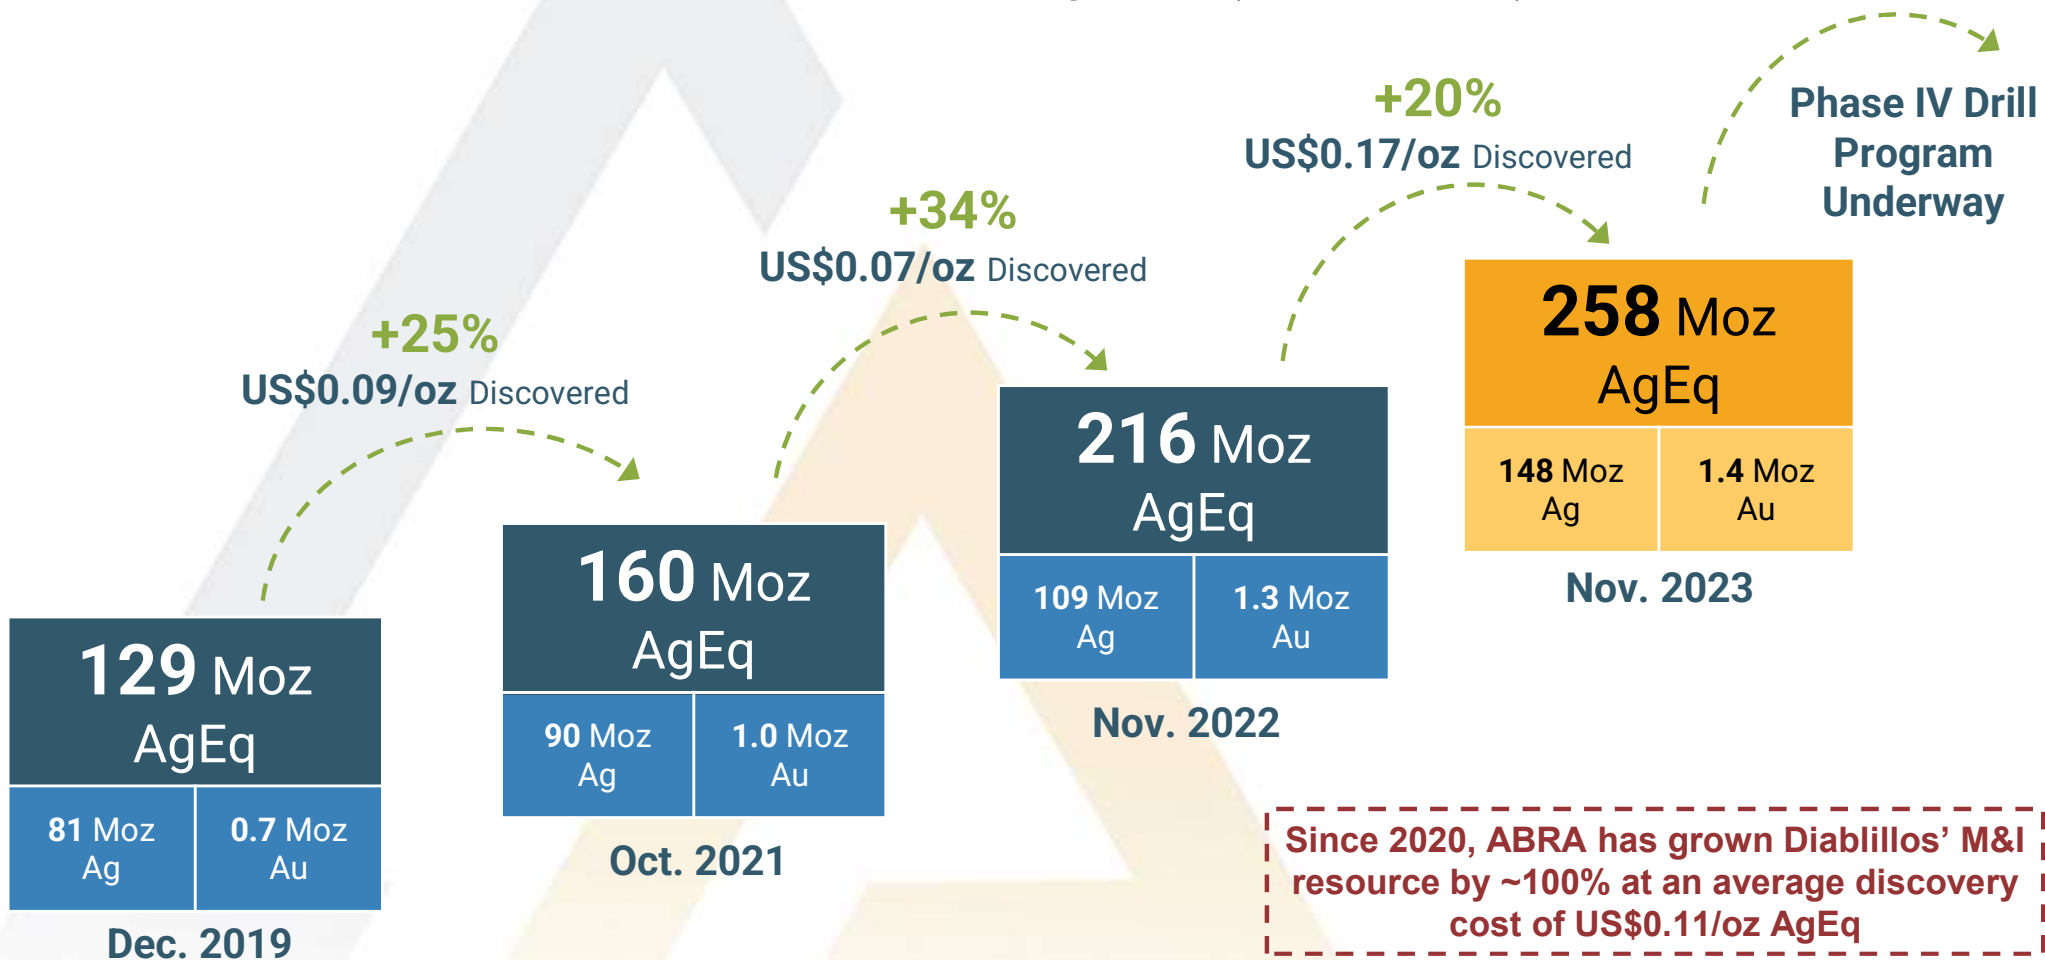

An aerial photograph of a large, terraced mountain slope, likely a volcanic cone, under a clear blue sky. The terraces are made of dark, rocky soil and are separated by light-colored dirt paths. A large, semi-transparent yellow triangle is overlaid on the center of the image. The text "Diablillos Project" is written in white, sans-serif font across the middle of the yellow triangle. In the background, there are more rugged, brownish mountains. A few small white vehicles are visible on a path on the left side of the image.

Diablillos Project

Consistently Transforming Exploration Into Value

Updated Diablillos M&I Resource of **258 Moz AgEq** → represents an increase of 20% relative to the November 2022 resource – underpinned by the recently-discovered, high-grade JAC target

Diablillos Resource Growth Since Acquisition (M&I Contained)⁽¹⁾⁽²⁾

Source: Capital IQ; Corporate disclosure; National Bank Financial

(1) Resource growth calculated based on AgEq and reflects Au:Ag ratio and metallurgical recoveries

(2) 2019-2021: US\$2.7M (15,100m drilled); 2021-2022: US\$4.1M (18,500m drilled); 2022-2023: US\$7.3M (24,100m drilled)

Robust PFS Results – With Significant Upside

December 2024 PFS Study – Operation Metrics

Mine Life / Throughput	14 years (9,000 tpd)
Initial Capital Expenditures (Incl. contingency)	US\$544 million
Avg Annual Production – First 5 years	11.7 M oz silver, 59 koz gold (16.4 Moz AgEq) @ AISC: US\$11.23/oz AgEq
Avg Annual Production – Life-of-Mine (“LOM”)	7.6 M oz silver, 72 koz gold (13.4 Moz AgEq) @ AISC: US\$12.67/oz AgEq

PFS Study – Financial Metrics

Base-Case: \$25.50/oz Ag & \$2,050/oz Au

NPV @ 5%
(US\$)

\$747
Million

NPV @ 5%
(CAD\$)

\$1,046
Million

IRR

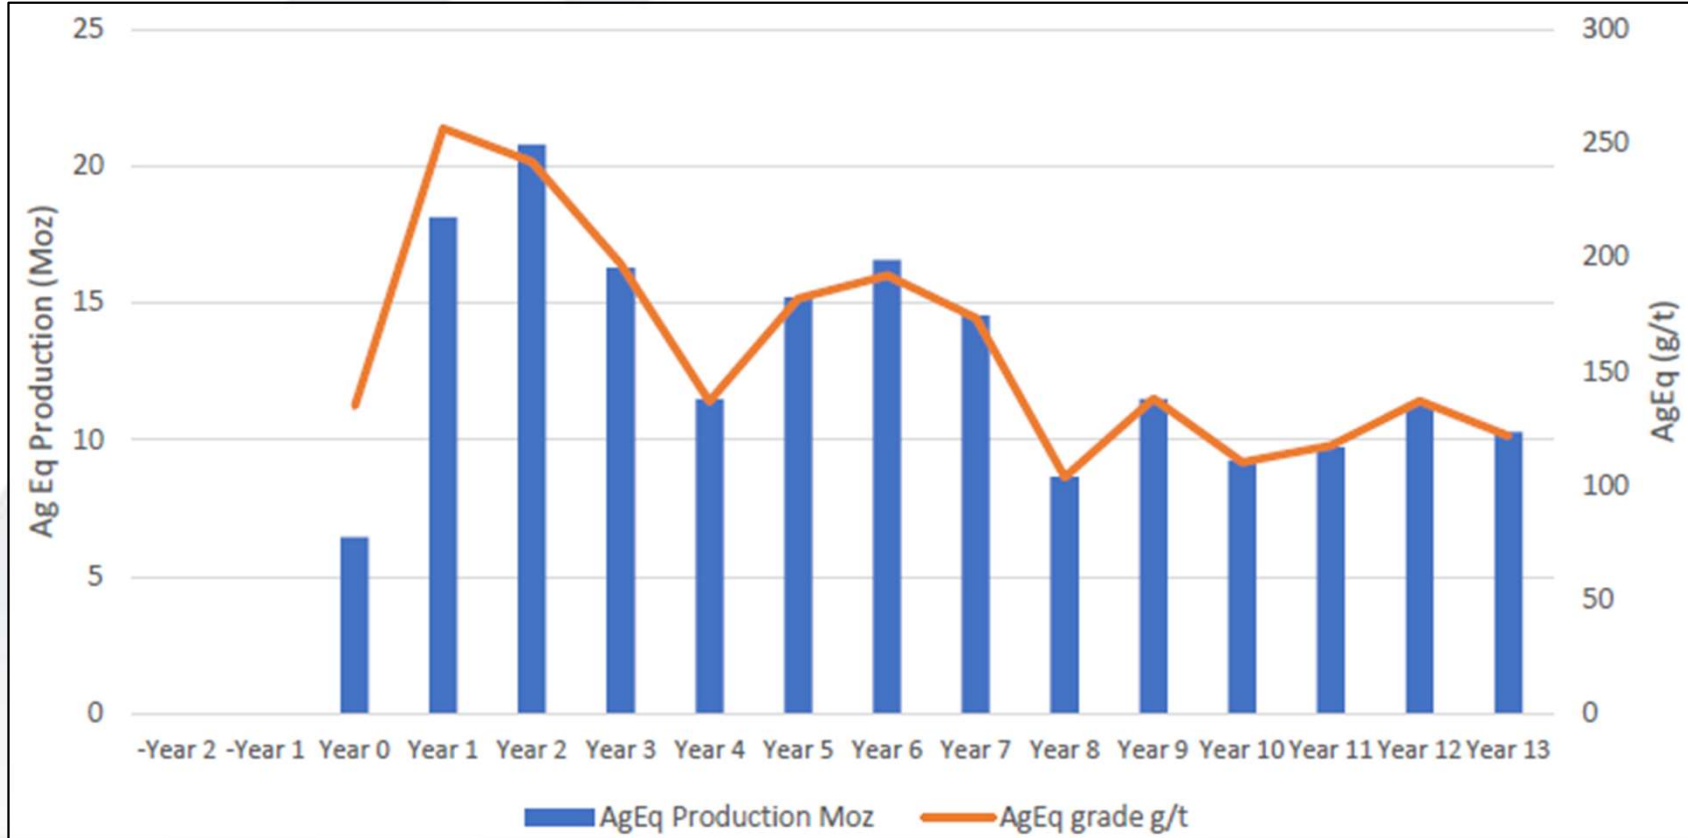

28 %

PAYBACK

2.0
Years

Attractive Production Profile With High Grades Upfront

- ▲ New mine plan increases NPV by **+\$60M** by improving mine sequencing
- ▲ Avg annual production in **first five years of 16.4 Moz AgEq** with peak of **20.8 Moz AgEq (Year 2)**
- ▲ Avg grade in first five years of **+201 g/t AgEq** (246 g/t AgEq in Year 2)
- ▲ Avg **after-tax free cash flow +US\$220M per year** over first 3-years (\$25.50/oz Ag & \$2,050/oz Au)

Updated Capital Costs

Updated initial capex of **US\$544 million** reflect a more detailed and accurate assessment of Project's requirements. ~80% of costs based on contractor quoted prices.

Increase mainly due to:

- I. Changes to F/X rates on imports: ~\$60M increase as spread on blue chip swap rate has narrowed to ~5% (vs. +100% in past)
- II. ~\$40M added to indirects: Enables increased manpower during construction (bigger camp, more bussing, catering, etc)
- III. ~\$50M increase in capitalized waste stripping previously allocated to opex

Key Opportunities:

- I. Power: Connection to grid would remove ~\$40M from capex & lower opex
- II. Heap leach scenario could enable a staged development approach. Opportunity to generate cash flow before expanding to full-scale production.

Description	Updated PFS Study	Prior PFS (Mar. 25, 2024)
	\$ millions	\$ millions
Surface Mining	128.6	39.3
Processing	111.7	96.9
Site Infrastructure	166.7	152.0
Owner and Indirect Costs	110.2	64.9
Initial Capital Costs (excl. contingency)	517.2	353.2
Contingency & Other Provisions	26.3	20.3
Initial Capital Costs	543.5	373.5
Sustaining Capital	76.5	65.0
Closure	26.4	11.1
Total Capital Costs	646.4	449.6

Key Benefits of RIGI: Incentive Regime for Large Investments

Qualifying projects +\$200M may apply for RIGI before the law expires in July, 2026, and must spend 40% of the investment amount within 2 years of approval (by no later than July 2028).

Diablillos meets all of the required qualifications for RIGI:

1 Tax Benefits

The RIGI offers a reduced corporate tax rate of 25% for large investments in specified sectors, including mining, compared to the standard 35% rate.

3 Investment Security (No F/X Restrictions)

Provides stability for tax, customs, and F/X rates for 30 years. Including full access to F/X market to repay loans, pay interest and dividends

2 Export Duty Exemptions

Elimination of all export duties – vs. the current rate of 8.0% for gold and 4.5% for silver

4 Accelerated Depreciation

RIGI allows for accelerated depreciation of equipment, infrastructure, and mine costs.

Key Impacts of RIGI¹:

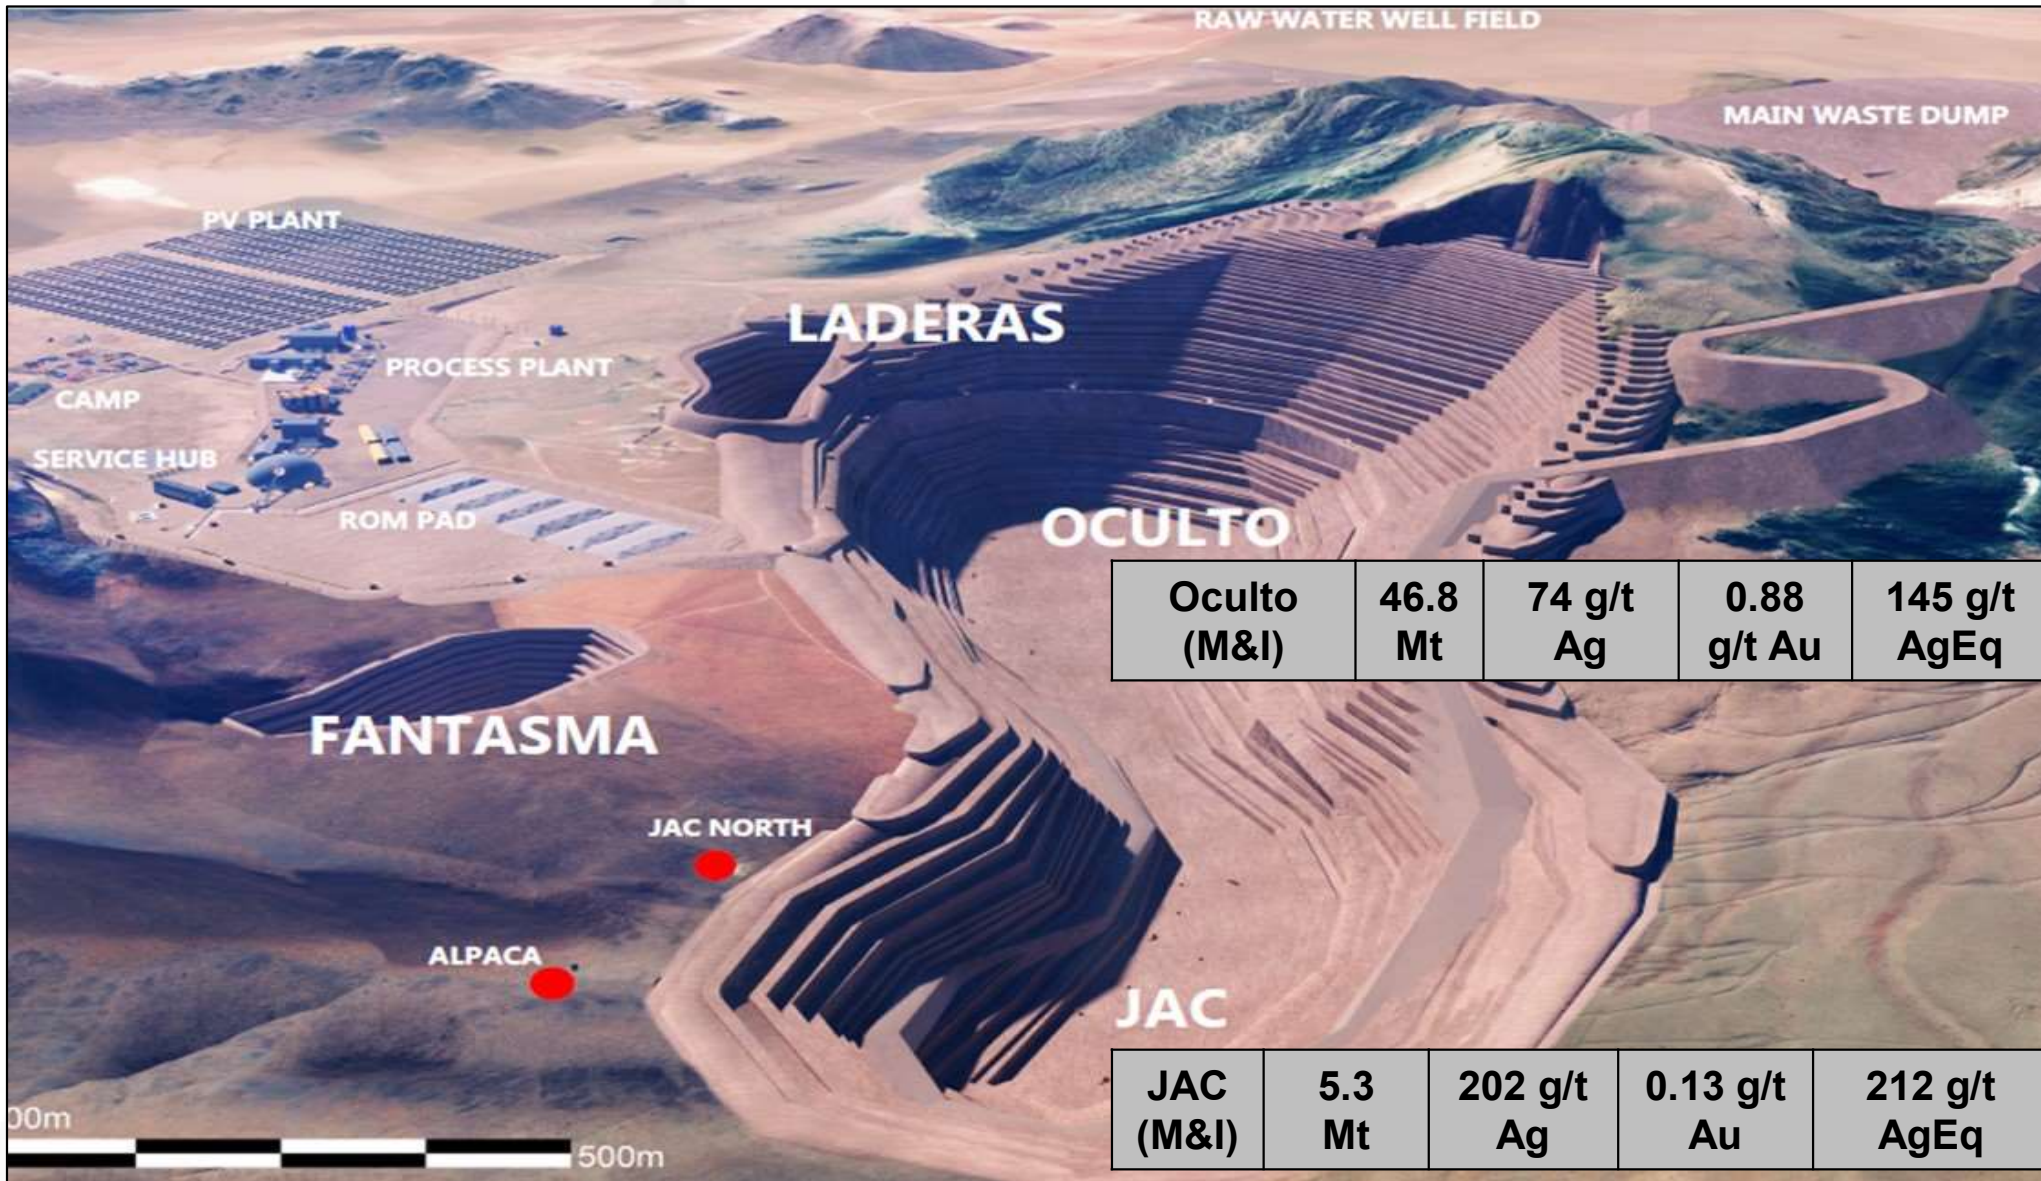

Total **savings of ~US\$430 M**

Updated taxes, royalties & export duties total \$536 M (vs. \$965 million)

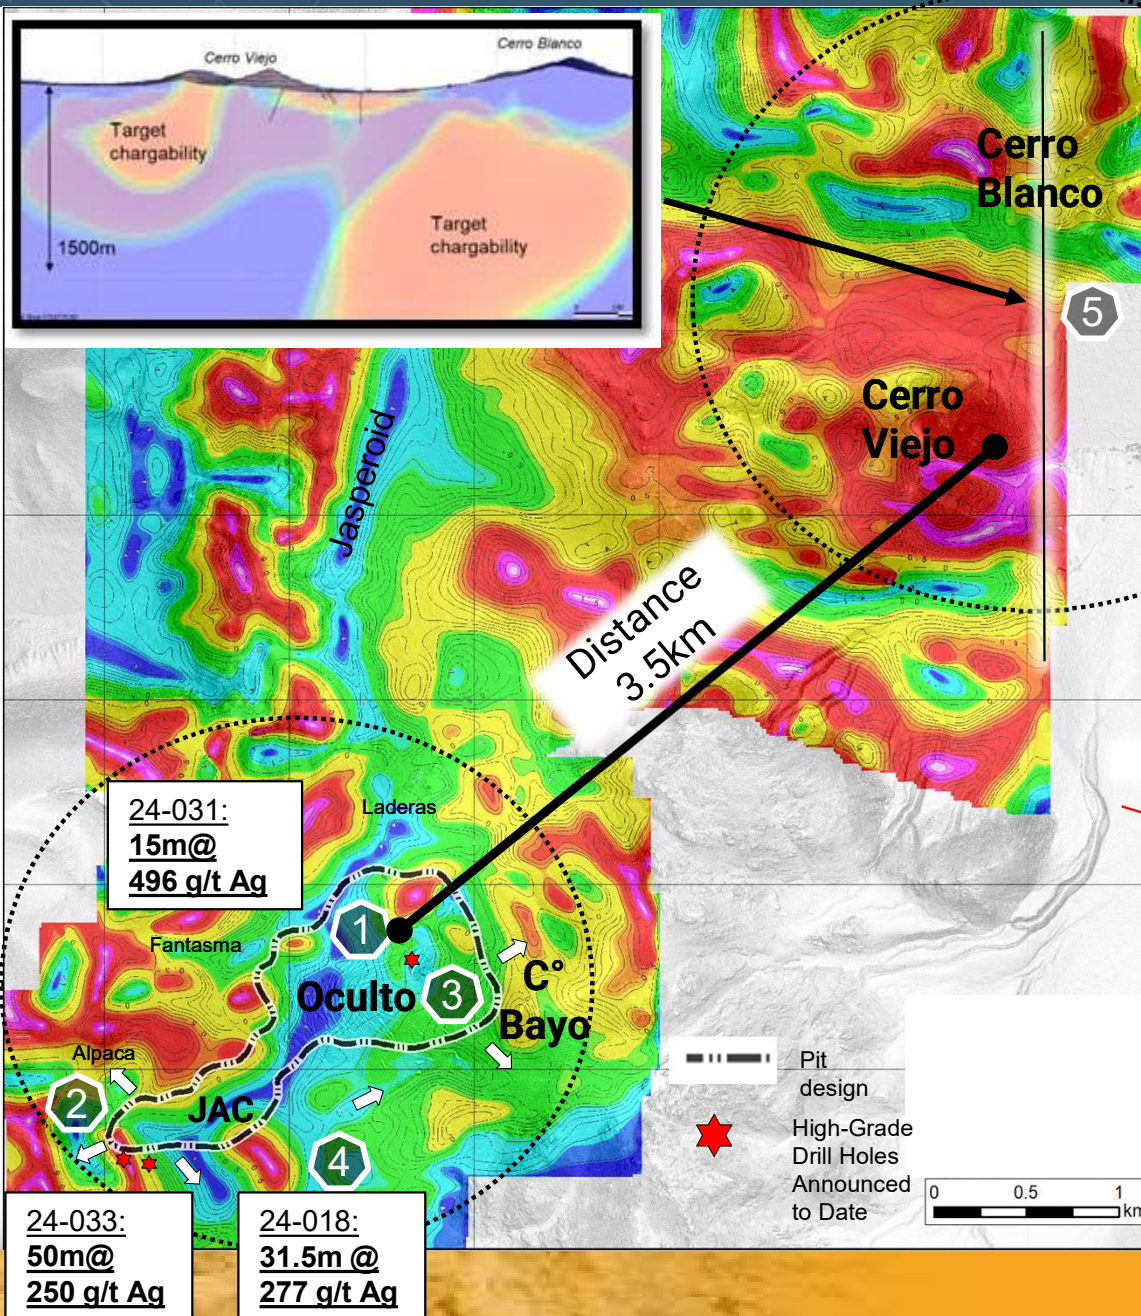

An investment decision would be required no later than the end of **Q2 2027** to ensure the Project captures the RIGI benefits.

¹Note: Refer to press release announced on December 3, 2024 for additional details

Diablillos Projected Mine Site Layout

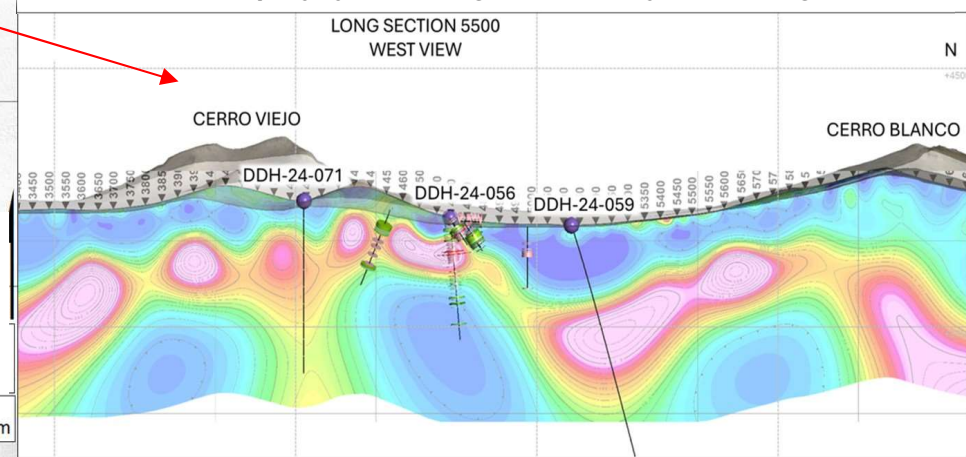

Continued Exploration Success: Advancing 20,000m Drill Program

- Multiple targets to expand high-grade zones around Oculto & JAC pit shells:
1. High-grade continuity within Oculto
 2. Connection of Alpaca to JAC
 3. Cerro Bayo & targets east of Oculto
 4. New alteration zone south of Oculto
 5. TITAN 3D target in Porphyry camp

Diablillos Porphyry Drilling Currently In Progress

Diablillos Porphyry Complex : Untapped District Scale Potential

3.2 km

High Leverage to Rising Silver & Gold Prices

At spot prices, the Diablillos project has a Net Present Value (NPV5%) of **+CAD\$1.8 Billion** or **+\$14.00/sh**. ABRA is currently trading at **<0.20x NPV**.

	PFS Study (Base-Case Prices)	Spot Prices (Dec. 2024)
Silver/Gold Price	\$25.50 / \$2,050	\$30.70 / \$2,651
IRR (after-tax)	28%	39%

Diablillos: World-Class Silver Resource With Significant Upside Potential

- Diablillos boasts a significant M&I Resource compared to other primary silver assets in Latin America
- Numerous smaller-scale assets are either being operated or developed by mid-tier silver producers

Diablillos Compared to Select Primary Silver Assets in Latin America (M&I Contained - Moz AgEq)⁽¹⁾

Source: Corporate disclosure; National Bank Financial

Note: AgEq contained has been estimated using an Au:Ag ratio of 85:1 and reflects metallurgical recovery rates for the corresponding mineral type based on the most recent NI 43-101 Mineral Resource estimate for Diablillos

(1) M&I Resources are presented inclusive of P&P Reserves, where applicable

Diablillos: A Top Primary Silver Asset

Diablillos hosts a significant silver M&I Resource, **totaling 148 Moz Ag** → well positioned versus producing primary silver mines globally

When combined with its attractive production scale, low costs and robust exploration potential → **Diablillos screens favourably** relative to peers' producing primary silver assets

Select Producing Primary Silver Assets (+50 Moz Ag Resource)

Source: Capital IQ; Corporate disclosure; National Bank Financial; S&P Global Market Intelligence

Note: AgEq costs and production has been estimated using an Au:Ag ratio of 85:1; LOM average cost and production used for development / C&M assets; Market information as of October 15th, 2024

(1) M&I Resources are presented inclusive of P&P Reserves, where applicable

La Coipita Project (San Juan, Argentina)

ABRA owns an option to acquire a large +70,000 ha project in one of the world's most endowed Cu-Au belts (e.g. Filo del Sol, Los Azules, Pelambres)

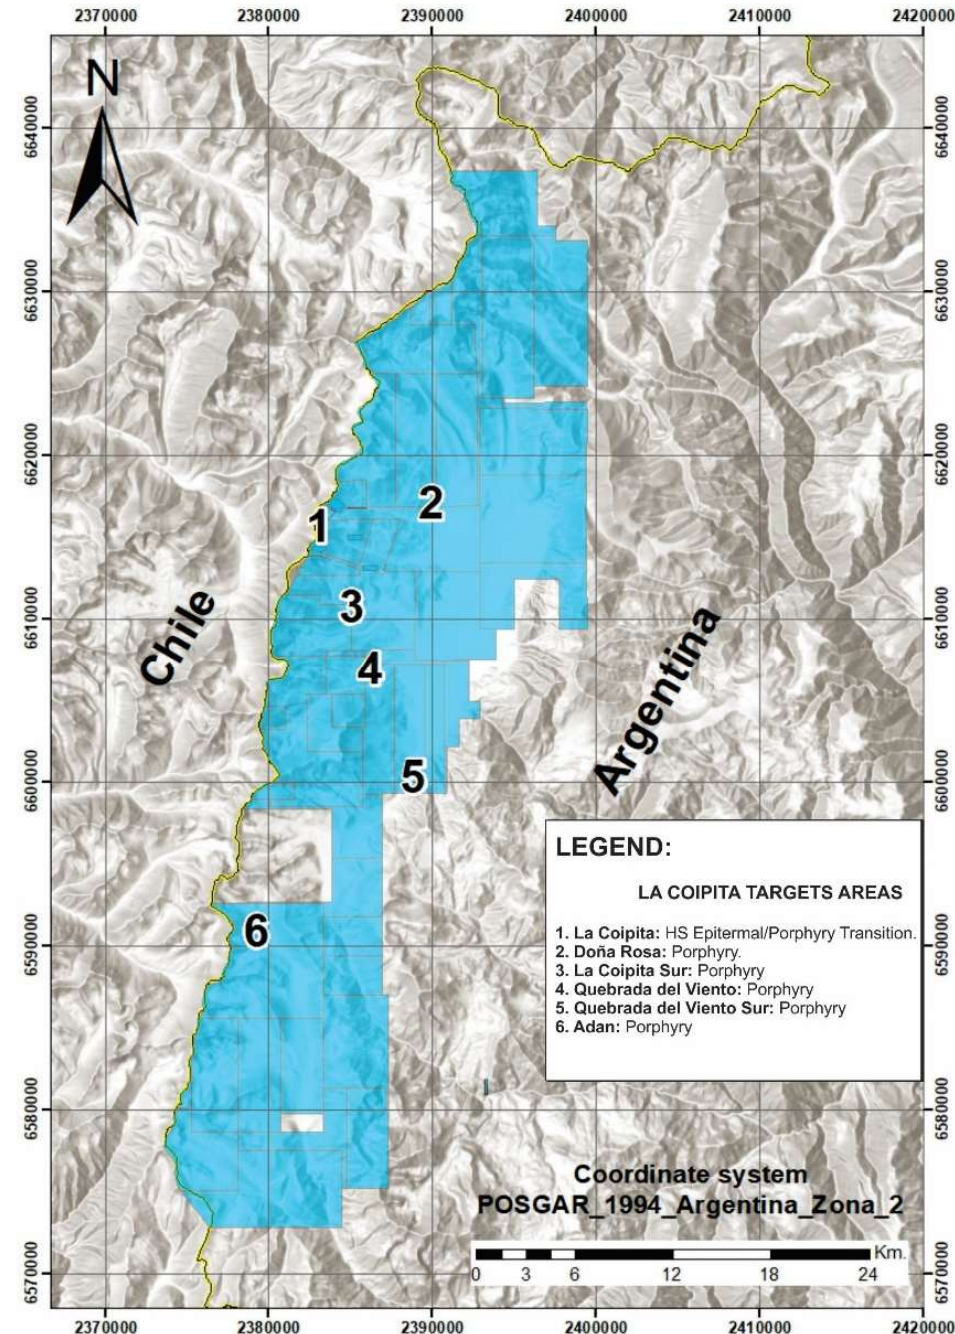

La Coipita – Partnership with Teck Resources

-  Partnership with Teck to explore district-scale porphyry system
-  Initial 2,600m drill program recently completed with assays now pending

Teck has option to earn an 80% interest by ⁽¹⁾:

-  Funding **US\$20M** in exploration over 5 years
-  Cash payments & equity placement in ABRA totaling **US\$3M**
 -  \$500k upfront payment (paid)
 -  \$1.0M equity placement in ABRA by Jan. 31, 2025 (at a 25% premium to VWAP)
 -  \$1.5M cash payment by Jan. 31, 2028
-  Making up to **US\$6.3M** in optional cash payments to underlying project vendors

(1) For additional information refer to the Company's press release dated Jan. 22, 2024

Key Near-Term Catalysts & Investor Takeaways

2024

Updated PFS Completed

- Significantly enhanced robust project economics

H1/
2025

Ongoing Drill Results

- Focused on further increasing resource size & quality

H2 /
2025

Permitting & Additional Drilling

- Receipt of key permits to enable construction decision and testing new targets

H1 /
2026

Feasibility Study (FS) & Construction Decision

- Completion of FS to provide a clear path to production

AbraSilver is poised for significant growth and value creation with:

 Strong project economics with significant growth potential.

 Multiple near-term catalysts to enhance shareholder value.

 Clear pathway to construction decision in late-2026.

A landscape of brown hills under a blue sky with a large yellow arrow pointing up and the text 'Additional Information' overlaid.

Additional Information

Additional Disclaimers

NON-IFRS MEASURES: This news release contains certain non-IFRS measures, including all-in sustaining cash cost (“AISC”). AISC includes operating costs, royalties, sustaining capital, closure costs, and corporate G&A and is calculated based on guidance provided by the World Gold Council (“WGC”). WGC is not a regulatory industry organization and does not have the authority to develop accounting standards for disclosure requirements. The Company believes that these measures, together with measures determined in accordance with IFRS, provide investors with an improved ability to evaluate the underlying performance of the Company and the results of the Company’s pre-feasibility study (the “PFS”). Non-IFRS measures do not have any standardized meaning prescribed under IFRS, and therefore they may not be comparable to similar measures employed by other companies. The data is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS.

DISCLOSURE FOR MINERAL PROJECTS: In this presentation, the definitions of proven and probable mineral reserves, and measured, indicated and inferred mineral resources are those used by the Canadian provincial securities regulatory authorities and conform to the definitions utilized by the Canadian Institute of Mining, Metallurgy and Petroleum (“CIM”), as the CIM Definition Standards on Mineral Resources and Mineral Reserves adopted by the CIM Council, as amended. The Mineral Resources disclosed in this presentation are further described in the technical report entitled “NI 43-101 Technical Report, Mineral Resource Estimate, Diablillos Project” dated January 10, 2024 and effective November 22, 2023. The Mineral Reserves disclosed in this presentation were reported in a press release dated March 25, 2024 and a National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”) compliant technical report will be filed on SEDAR+ and the Company’s website within 45 days of March 25, 2024. This presentation also contains information in respect of the Company’s exploration projects. Certain of the potential quantities and grades included in this presentation are conceptual in nature, that there has been insufficient exploration to define a mineral resource in respect of certain of the Company’s exploration targets and it is uncertain if further exploration will result in such targets being delineated as a mineral resource.

The technical information contained in this presentation has been approved by David O’Connor, PGeo. Mr O’Connor is a Member of the Australasian Institute of Mining and Metallurgy (“AusIMM”), and is a Qualified Person in accordance with NI 43-101.

THIRD PARTY INFORMATION: This presentation includes market and industry data which was obtained from various publicly available sources and other sources believed by the Company to be true. Although the Company believes it to be reliable, the Company has not independently verified any of the data from third-party sources referred to in this presentation, or analyzed or verified the underlying reports relied upon or referred to by such sources, or ascertained the underlying assumptions relied upon by such sources. The Company does not make any representation as to the accuracy of such information.

TAXATION: Prospective investors should be aware that the purchase of securities of the Company or any entity related thereto may have tax consequences. The Company assumes no responsibility for the tax consequences of any investment. Each prospective investor is strongly encouraged to consult its own tax advisor concerning any purchase of securities of the Company or any entity related thereto.

Experienced Leadership Team with Proven Success

Management

John Miniotis, Chief Executive Officer

- 20+ years of experience in the mining industry (Lundin Mining, AuRico Metals, Barrick, BMO) focused primarily on mergers & acquisitions, equity capital markets, IR & corp finance

David O'Connor, Chief Geologist

- 45+ years' experience acquiring, exploring, and developing mineral projects in South America & executive management. Responsible for early exploration at the world-class Olympic Dam project

Carlos Pinglo, Chief Financial Officer

- 25+ years experience in financial management with a focus on Latin American jurisdictions

Jeremy Weyland, SVP Projects & Development

- 20+ years focused on projects, technical services & due diligence includes Lundin Mining & Kinross Gold

Eugenio Ponte, Country Manager

- 25+ years primarily focused in environmental and corporate social responsibility in various projects throughout Argentina

Large P&P Reserves: ~210M oz Silver-Equivalent

Mineral Reserve (all domains)	Tonnage (000 t)	Au (g/t)	Ag (g/t)	AgEq (g/t)	Contained Ag (000 oz Ag)	Contained Au (000 oz Au)	Contained AgEq (000 oz AgEq)
Proven	12,364	0.86	118	185	46,796	341	73,352
Probable	29,930	0.80	80	142	76,684	766	136,267
Total Proven and Probable	42,294	0.81	91	154	123,480	1,107	209,619

Notes for Mineral Reserve Estimate:

1. Mineral reserves have an effective date of March 07, 2024.
2. The Qualified Person for the Mineral Reserve Estimate is Mr. Miguel Fuentealba, P.Eng.
3. The mineral reserves were estimated using the Canadian Institute of Mining, Metallurgy and Petroleum (CIM), Definition Standards for Mineral Resources and Reserves, as prepared by the CIM Standing Committee on Reserve Definitions and adopted by CIM Council.
4. The mineral reserves were based on a pit design which in turn aligned with an ultimate pit shell selected from a Whittle™ pit optimization exercise. Key inputs for that process are:
 - Metal prices of US\$ 1,750/oz Au; US\$ 22.50/oz Ag
 - Variable Mining cost by bench and material type. Average costs are US\$ 1.94/t for all lithologies except for "cover" Cover mining cost of US\$ 1.73/t, respectively.
 - Processing costs for all zone, US\$ 22.97/t.
 - Infrastructure and G&A cost of US\$ 3.32/t.
 - Pit average slope angles varying from 37° to 60°
 - The average recovery is estimated to be 82.6% for silver and 86.5% for gold.
5. The Mineral Reserve Estimate has been categorized in accordance with the CIM Definition Standards (CIM, 2014).
6. A Net Value per block ("NVB") cut-off was used to constrain the Mineral Reserve with the reserve pitshell. The NVB was based on "Benefits = Revenue-Cost" being positive, where, Revenue = [(Au Selling Price (US\$/oz) - Au Selling Cost (US\$/oz)) x (Au grade (g/t)/31.1035)] x Au Recovery (%) + [(Ag Selling Price (US\$/oz) - Ag Selling Cost (US\$/oz)) x (Ag grade (g/t)/31.1035)] x Ag Recovery (%) and Cost = Mining Cost (US\$/t) + Process Cost (US\$/t) + Transport Cost (US\$/t) + G&A Cost (US\$/t) + [Royalty Cost (%) x Revenue]. The NVB method resulted in an average equivalent cut-off grade of approximately 46g/t AgEq.
7. In-situ bulk density was read from the block model, assigned previously to each model domain during the process of mineral resource estimation, according to samples averages of each lithology domain, separated by alteration zones and subset by oxidation.
8. All tonnages reported are dry metric tonnes and ounces of contained gold are troy ounces.
9. Mining recovery and dilution factors have not been applied to the Mineral Resource estimates.

Oculto Geological Model

Epithermal Ag-Au Deposit with Cu-Au Porphyry Intrusive

- Diablillos property has multiple epithermal and porphyry targets
- Oculto Zone contains majority of the resources and has over 120,000 m of drilling, but only down to a depth of ~400 m
- Past drilling focused on the high sulphidation epithermal zone, hosted in volcanics and mostly oxidized
- Recent drilling confirmed that hydrothermal breccias continue into the basement and contain copper and gold mineralization in sulphides
- Strong possibility of a porphyry intrusive nearby

Industry-Leading Drill Results

13.	ABRA (Diablillos)	DDH-22-004	2022-04-11	140.0	315	44,100

Source: Data from S&P Global, as of Jan 2023. Includes intercepts from primary silver assets.

AgEq calculation includes Ag & Au values only based on formula: $AgEq\ grade = Ag\ grade + Au\ grade \times (Gold\ Price/Silver\ Price) \times (Gold\ Recovery/Silver\ Recovery)$, where gold price = \$1750/oz and silver price = \$25.00/oz. For Diablillos gold recovery = 86% and silver recovery = 73.5%

Long-Section of High-Grade Intercepts Oxides & Sulphides

- ▲ Beneath the oxide gold zone, we've intersected several high-grade Cu/Au sulphide intercepts
- ▲ The sulphide zone currently extends for ~ 2 km, and remains largely untested
- ▲ Represents a significant exploration target which will be evaluated in future drill campaigns

Summary of High-Grade Results To Date

High-Grade Results

AbraSilver has consistently achieved significant high-grade results to date.

Ongoing Exploration

We continue to explore and expand our understanding of the mineral deposits.

Diablillos – Excellent Access to Infrastructure

- ▲ Located in an established mining camp that includes multiple lithium and borate mining operations
- ▲ Accessible by good all-weather gravel roads with nearby airstrip (~25 km)
- ▲ A natural gas pipeline built to supply mining projects like Diablillos is located 34 km from the project. Currently evaluating solar power energy for Diablillos
- ▲ Pump testing shows sufficient subterranean water available near the project with easements in place
- ▲ No communities on or near property – low permitting risk with EIA permits submitted in 03-2024

Conventional Process Flowsheet

DIABLILLOS – SILVER GOLD PROJECT

Excellent Metallurgical Testwork Results

84%

Average LOM Silver Recovery

87%

Average LOM Gold Recovery

- A substantial percentage of the silver and gold can be recovered by gravity separation which results in **higher recovery rates and lower processing costs**
- **Fine grinding is not necessary** with the most efficient recoveries achieved at a grind size of 150 microns for both gravity and cyanidation and an optimal retention time of 36 hours.

Process design will consist of a conventional silver/gold oxide processing plant flowsheet:

Water Easements in Place

- Abundant nearby fresh water with easements in place
- Easements already in place for several wells with applications being prepared for additional easements
- Adequate supply identified for up to a 9,000 tpd operation with plans to explore for additional water resources.

La Coipita Option Payment Schedule

 The Company has entered into two separate option agreements with arm's length private owners to acquire a 100% interest in La Coipita. First agreement, announced on March 2, 2020:

Timing	Payments (US\$)
Paid upon signing	\$65,000
March 2021 (paid)	\$100,000
March 2022 (paid)	\$200,000
March 2023 (paid)	\$400,000
March 2024 (paid)	\$1,000,000
March 2025	\$2,500,000

 Second agreement, announced on August 17, 2021:

Timing	Payments (US\$)
Paid upon signing	\$50,000
August 2022 (paid)	\$75,000
August 2023 (paid)	\$100,000
August 2024 (paid)	\$500,000
August 2025	\$800,000
August 2026	\$1,500,000

Capital Structure (as of November 2024)

	Outstanding (M)	Price	Potential Proceeds (CAD\$ M)	Expiry
Basic Shares Outstanding	126.8			
Total Warrants	1.6	\$2.50	\$4.0	Dec. 6, 2024
Total Options	4.9	\$1.25	\$6.1	Present – Feb. '28
Fully Diluted Shares	132.6
